

Youth Adventure Voyage  
13 -17 April 2019

Dear Sponsor,

Thank you for your support to provide an opportunity for me to sail on the Youth Adventure Voyage.

One of the best experiences / activities was watching the shooting stars, dolphins and the beautiful milky-way during the midnight to ~~6 AM~~ <sup>4 AM</sup> watch, this is a view I will never forget. The array of stars were breath taking. I thought shooting stars ~~were~~ <sup>are</sup> rare but boy was I wrong. I didn't enjoy other activities because they were all fast paced, I couldn't keep up. Even though I struggled with most instructions/activities I still have to learn so much about Me One and All and the ocean. I truly thank my sponsor for this amazing experience ~~within the~~

What I have learnt about myself from this voyage I have learnt that I am not as strong as I thought, I struggled with most things/ instructions on board. On the first day I was super nervous about the social aspect of things and now I feel totally good talking to the crew. I have <sup>also</sup> learnt that just because my family have fishing careers it doesn't mean I'll follow their career path.

Thank you from Jena Tyrrell-Kolega

Youth Adventure Voyage  
13 -17 April 2019

Dear Sponsor,

Thank you for your support to provide an opportunity for me to sail on the Youth Adventure Voyage.

One of the best experiences / activities was Climbing up the formast at ~~11:30~~ 0430 on the second day, climbing onto the course yard-arm and Securing the course sail onto the yard. Once there, I realised that my carabeener got tangled to the lower and upper forstay sails lines which was untangled after 30 minutes of myself <sup>just</sup> hanging on for dear life on the ~~to~~ yard arm. Another absolutely fantastic experiences of mine was an lookout with my fellow 'Port watch' crew whom I have thoroughly bonded with. Whilst on lookout duty my entire watch went onto the jib nets and lay there admiring the magnificent view of the starry nights sky when we ~~were~~ encountered bioluminescent dolphins swimming with the One & All.

What I have learnt about myself from this voyage I have learnt many things about myself on this voyage including that I am one of the few people that didn't get seasick whatsoever. Another thing that I have learnt is that I'm not afraid of heights (which was surprising) and the fact that my watch, although newly aquanted, have made a strong bond/connection with them that has made me more willing to openly express myself to others.

I also really want to continue going on voyages with the One & All as well as other vessels to gain

After this voyage

Thank you from Amber Finn.
